

SUPER AB A200

DESIGNED SPECIFICALLY AS A SOIL AMENDMENT FOR APPLICATIONS IN HORTICULTURE & AGRICULTURE

Super absorbent polymer (potassium-based), capable of absorbing, conserving and releasing more than 200 times its weight in water and nutrients.

INCREASES WATER-HOLDING CAPACITY AND NUTRIENT RETENTION OF SOILS

- In a dry environment, the retained water will be gradually released as needed.*
- In a wet environment, any excess water is absorbed.*
- Reduces hydric stress and dried areas.*
- Prevents loss of water and nutrients due to leaching.*

EFFECTIVE, ECONOMICAL & ECO-FRIENDLY SOIL SUPPLEMENT SOLUTION

INCREASES YIELD , GROWTH RATE AND QUALITY OF PRODUCTS

REDUCES WATERING FREQUENCY BY 50%

ENHANCES SOIL AERATION AND CONDITIONING

IMPROVES FERTILIZER RETENTION IN THE SOIL

PROVIDES MOISTURE TO PRODUCTS DURING TRANSPORTATION

DURABILITY OF MORE THAN 5 YEARS

BIODEGRADABLE AND ECO-FRIENDLY

ALLOW CULTIVATION ON SLOPPED SURFACES

REGISTERED (NO. 2016091A) WITH CFIA AS PER FERTILIZER ACT.

SUPER AB A200

Applications

GRASS

TREES

GREENHOUSE

LANDSCAPING

FLOWERS

GARDENING

PLANTING

AGRICULTURE
